**DETAILED ACTION**

***Allowable Subject Matter***

Claims 15-16 are allowed.

The following is an examiner's statement of reasons for allowance: a method of forming a deposited film including a step of supplying power from a power source to a power applying electrode (plasma generating electrode) spaced above a grounded flat plate base member and electrically insulated from each other using electrically insulating spacers placed therebetween, wherein the plasma generating electrode is fixed to the base member with a plurality of electrically insulating fastening members at positions effective to suppress deformation of the electrode.

Neither of the prior arts of the record teaches or suggests a method of forming a deposited film by applying power to a plasma generating electrode, wherein the electrode uses *electrically insulating fastening members for fixing the plasma generating electrode to the base member such that deformation of the electrode is suppressed.*

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Parviz Hassanzadeh whose telephone number is (571)272-1435. The examiner can normally be reached on Tuesday-Friday.
